The future is pattern texturing. This chapter will discuss trends in the field as well some new developments that are being made by companies to make their products more attractive for consumers.

In this section we'll look at patterns on textiles with a focus around textile design (patterns). We're going through how these designs have changed over time from traditional shapes such as square or rectangular motifs; geometric forms like circles etc., but also what they mean today's fashionable styles including vintage prints!

Pattern Textures can be found everywhere! They've become so popular because it makes them easy-to-use pieces which you could use anywhere without having any special skills required. (See our tutorial below!)

Helping others is a full honor also in the community. The Thanksgiving day was organized yesterday by me and my friends from the local church. We had a delicious dinner with lots of food and drinks. I am so happy to see people eating together and sharing their stories. It's a great way to connect with others and build relationships. I hope everyone had a wonderful Thanksgiving!
